## EXPERIENCE

### ASSISTANT TECHNICAL DESIGNER (*Temporary position*)

Survival Armor | Fort Myers, FL | May 2020 - present

- Developed and modified flat sketches and technical specification packages for apparel manufacturing using Adobe Illustrator
- Created markers for optimal material utilization while respecting pattern and fabric quality boundaries using Gerber Accumark
- Plotted and emailed markers and patterns to in-house and offsite teams in accordance to set production schedule
- Suggested recommendations for pattern improvements upon evaluation of garment for quality and fit

### TECHNICAL DESIGN COORDINATOR (*COVID-19*)

Chico's FAS, Inc | Fort Myers, FL | October 2019 - April 2020

- Maintained data and log samples upon receipt in department Fit List
- Prepared for daily fittings for 5 different product categories: measured samples, evaluated garment fit and construction as it relates to the specific standard requirements
- Reviewed garment patterns in Optitex patternmaking software to suggest edits to vendors
- Assisted in the development of tech packs including entry of measurements, pictures, sketches, and additional relevant information into PLM system
- Input fit notes and comments to Flex PLM system
- Coordinated, scheduled, and set up of fittings with Microsoft Outlook
- Communicated daily with vendors via email on various technical issues

### TECHNICAL DESIGNER

Honeywell - First Responder Products | Dayton, OH | March 2019 - August 2019

- Provided sustaining technical design and patternmaking support to U.S. based garment manufacturing
- Modified existing work instructions and tech packs using Microsoft Excel and Adobe Illustrator
- Collaborated with manufacturing teams to establish and document best practices
- Investigated and identified parts to gain understanding of assembly to apply to tech pack building
- Updated patterns in Gerber Accumark patternmaking software
- Made appropriate recommendations in collaboration with peer teams on matters pertaining to specifications, patterns, construction methods, and techniques to improve overall quality of the garment
